

To Parents or Guardians:

Please take advantage of the once a month opportunity for your child have their immunizations updated here at Keefer Crossing Middle School on or around the end of the month by a reliable company called Immunovax, run by Mike Adams. This company provides the HepB, HepA, Tetanus, Varicella, Meningitis and Gardasil (for prevention of HPV) vaccinations at a cost of \$14.00 ea. or \$20.00 for two injections. Notices go home once a month concerning your child's vaccine records if they need to be updated. The District Health Coordinator is stressing the importance of receiving the Meningitis shot for all students. The Meningitis shot given in our district a few years ago is no longer affective and to prevent another outbreak in our region, it is advisable to have your student vaccinated. Having it done at school is a convenient way to have your student vaccinated. Having it done at school is a convenient way to keep up with these records without having to take time off from work or other activities.

If you receive a notice concerning your child's records and would like to take advantage of this service, please have your child come to the school clinic to pick up the necessary forms to be filled out and brought back to the school clinic.

Virgie Thrasher, LVN
School Nurse, Keefer Crossing Middle School
